COVER STORY: Every train has a story – but some instantly demand a second look. A bold heritage paint scheme, a flash of color from a mixed string of containers, or a locomotive that simply commands attention can turn an ordinary freight into a memorable experience. That's the excitement railroading brings, and it's what WaltherMainline delivers to your layout or collection. WaltherMainline locomotives and rolling stock capture the look, sound, and feel of the real thing.

Here, a striking CSX Chessie System GE ES44AC GEVO thunders past with a train of WaltherMainline NSC articulated 3-unit 53' well cars, each loaded with colorful SceneMaster™ containers, as it meets another hot intermodal on the neighboring track. It's a moment of modern railroading brought vividly to life – one you'll want to bring home to your layout!

THIS PAGE: In the steam and early diesel eras, few freight movements mattered more – or moved faster – than trains carrying perishable goods. These were the railroad's true hotshots: long strings of ice-cooled wooden refrigerator cars racing meat and produce from fertile growing regions to distant eastern markets. Time was critical, and along the way these trains made essential stops to recharge their ice bunkers before pressing on. Here, three 40' Early Wood Reefers pause beneath an icing deck, capturing a fleeting but vital moment in classic railroading.

The real cars that inspired the WaltherMainline 40' Early Reefers bucked the trend of preferred steel car construction – simply put, wood had superior insulating properties. Ice-cooled, all-wood reefers continued earning their keep well into the early 1970s, making the WaltherMainline replicas a welcome addition to your steam or classic diesel-era pike!

WALTHERSMAINLINE®

TOUGH ON THE OUTSIDE, TOUGH ON THE INSIDE!

Whether you're running on a club layout, show display or at home, WalthersMainline engines are built to stand up to the toughest HO operating environments.

At the heart of every model is the same rugged, proven drive used in WalthersProto locomotives. This state-of-the-art system is built around a can motor, featuring a five-pole, skew wound armature that provides smooth starts and stops, and plenty of power. The drive train is equipped with 14:1 helical cut gears that reduce operating noise, and provide superior strength that translates into outstanding pulling power and longer operating life. All-wheel-drive and electrical pick up, along with a flywheel keep trains moving past dirty track and other potential power drops. A heavy die-cast metal frame that keeps the weight on those correct size RP-25 metal wheels, makes for impressive pulling power with long or short trains.

Durable details on the body shell stand-up to frequent handling with no danger of breaking off, and Walthers own Proto MAX™ metal knuckle couplers stand up under pressure when others won't. WalthersMainline locomotives also feature a convenient pre-installed speaker as well as optional ESU Sound and DCC.

Now you can capture this unmistakable modern scene in HO scale with wind turbine kits, 110-ton flatcars, turbine blade loads and realistic technician figures.

An update on the Walthers Reference Book

To our Valued Customers:

For many years, the Walthers Reference Book has been an important part of the hobby, and we know it has been especially valued by customers who enjoy having a trusted printed resource at hand. We are genuinely grateful to everyone who has supported and relied on it over the years. We have been proud to provide it as a valuable resource to so many people for so long. After careful consideration, we have made the decision to pause production of the Reference Book. There will not be a Reference Book published in 2026.

It's important to note that the information traditionally found in the reference book remains available online at Walthers.com, where it is updated frequently and can be accessed at any time. For many customers, this shift will have little impact. We recognize that for those who prefer a printed reference, this news may be disappointing—and we understand that reaction.

In the Spring of 2026, Walthers will celebrate 94 years in business. Over nearly a century of serving the model railroading industry, we have evolved our offerings to meet the needs of the time. The Reference Book evolved and changed over time, too.

Rest assured, this publication pause does not change Walthers commitment to the hobby or to you, our valued customers. We remain committed to producing and supplying a wide variety of high quality, reliable products as well as accurate, accessible information, service, and programs to enable enjoyment of the hobby by all — experienced modelers, newcomers, and everyone in between.

We are not closing the door on the possibility of a printed reference in the future, but for now, we appreciate your understanding as we continue our evolution focused on serving model railroaders and stewarding the enjoyment of this amazing hobby.

Thank you for your continued support. We welcome your thoughts, should you like to provide them to us at custserv@walthers.com.
