

HO Scale Kit

REFINERY PIPING KIT

933-3114

Thanks for purchasing this Cornerstone kit. All parts are made of styrene plastic, so use compatible paint and glue. Please read these instructions and study the drawings before starting construction.

This kit is designed for use with the Cornerstone Series® United Petroleum Refining (933-3705). However it can be used for any piping application to fit your needs. By combining the various components you will be able to duplicate just about any piping arrangement.

UPRIGHT PIPE SUPPORT

The upright piping supports set on the small concrete pads. The vertical piping sections can be used to drop the piping to different levels. Horizontal piping sections can be assembled in any configuration. Use the pipe connectors in between sections. The large concrete pads can be used to model ground level.

For additional details and accessories to add the finishing touch to your model, visit your local hobby shop, see the current HO Model Railroad Reference Book or visit us online at walthers.com.
