

HO Scale Detail Kit **WOODEN FENCING (3-PACK)** 933-3521

Thanks for purchasing this Cornerstone Series® Kit! Please read all instructions before starting. All parts are molded in styrene plastic, so use glues and paints which are compatible.

Glue the fence posts (74) on the horizontal braces on the backs of the fences (72,73), using the raised ribs on the fence posts as a guide to position them on those braces. Glue the posts onto both ends of the fences and space them equally in between. Note: If you glue two fence pieces at right angles to each other, you will need only one post in that corner.
