

HO Scale Kit ROOF DETAILS 933-3733

Thanks for purchasing this Cornerstone Series® kit. All parts are styrene, so use only compatible glue and paint. Please read the instructions and study the drawings before starting.

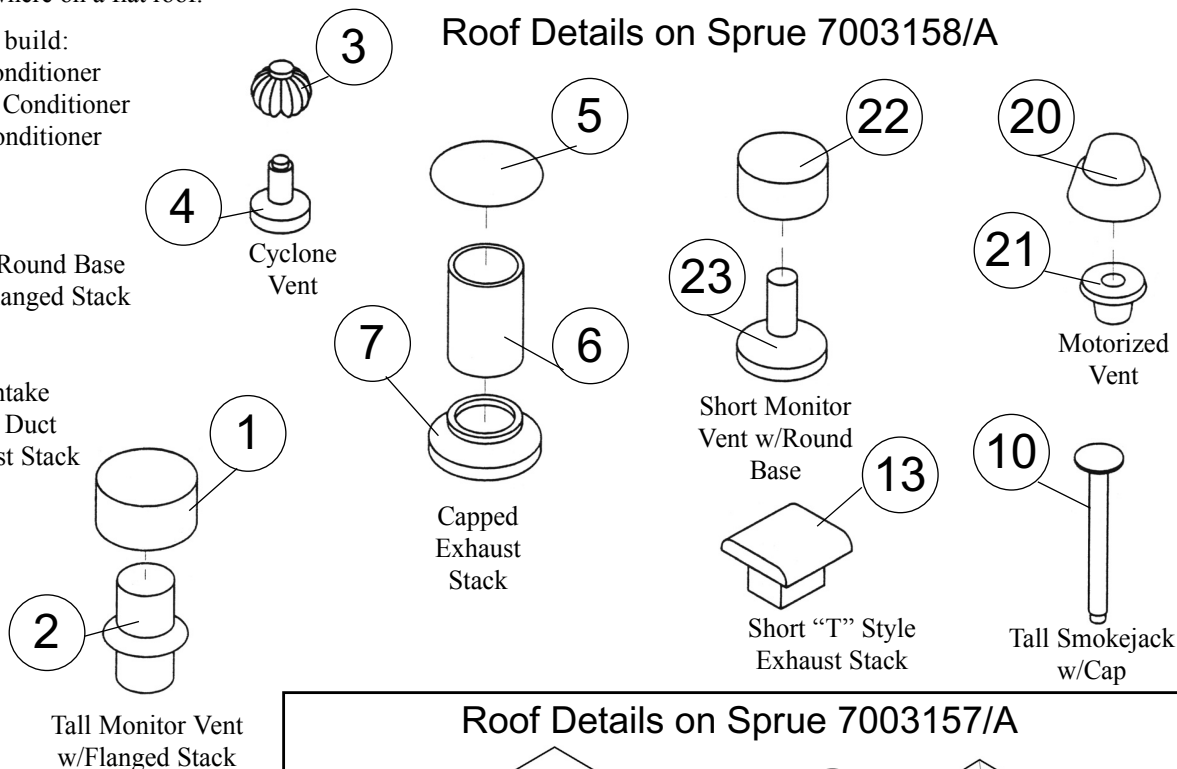

PLEASE NOTE: There are some duplicate part numbers on the sprues. Please refer to the illustrations to identify the correct sprue during assembly; individual part numbers may be on the back of the piece or on the sprue.

Vents and air conditioning units are typically used on commercial, industrial and public buildings to move air in or out of work areas, or control heat, humidity and dust. Large buildings often have a tremendous variety of air-handling equipment so parts can be mixed and matched, and installed anywhere on a flat roof.

This set includes parts to build:

- 1 Large Roof-Top Air Conditioner
- 1 Medium Roof-Top Air Conditioner
- 1 Small Roof-Top Air Conditioner
- 2 Small Swamp Cooler
- 1 Motorized Blower
- 4 Cyclone Vent
- 4 Short Monitor Vent w/Round Base
- 3 Tall Monitor Vent w/Flanged Stack
- 2 Capped Exhaust Stack
- 3 Motorized Vent
- 3 Wind Direction Vent/Intake
- 3 Angled Exhaust/Intake Duct
- 4 Short "T" Style Exhaust Stack
- 5 Tall Smokejack w/Cap
