

HO Scale Kit **MODERN FIRE ESCAPES** 933-3736

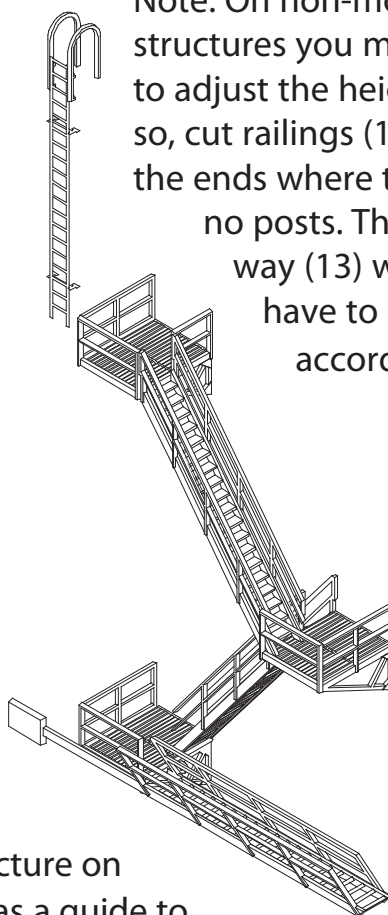

Thanks for purchasing this Cornerstone Series® kit. Please take a few minutes to read the directions and study the drawings.

Adaptable to any structure, this kit includes parts to build a single fire escape up to four stories tall. Additional kits (sold separately) can be combined for use on taller buildings. PLEASE NOTE: This kit can be built with either a large (#4) or small (#1) platform. The large platform produces a zigzag pattern for narrower buildings, while the small platform creates a descending stairway for larger structures. On buildings made of Cornerstone Modulares™ parts, each level of the zigzag design fits a single large wall; descending stairs fit two large walls. With either design, platforms should align with a doorway or window.

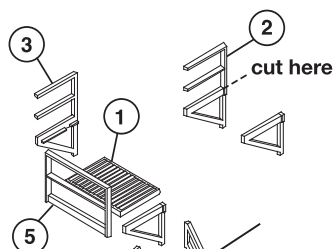

ZIGZAG - LARGE PLATFORM

Note: On non-modular structures you may need to adjust the height. To do so, cut railings (14, 15) at the ends where there are no posts. The stairway (13) will then have to be trimmed accordingly.

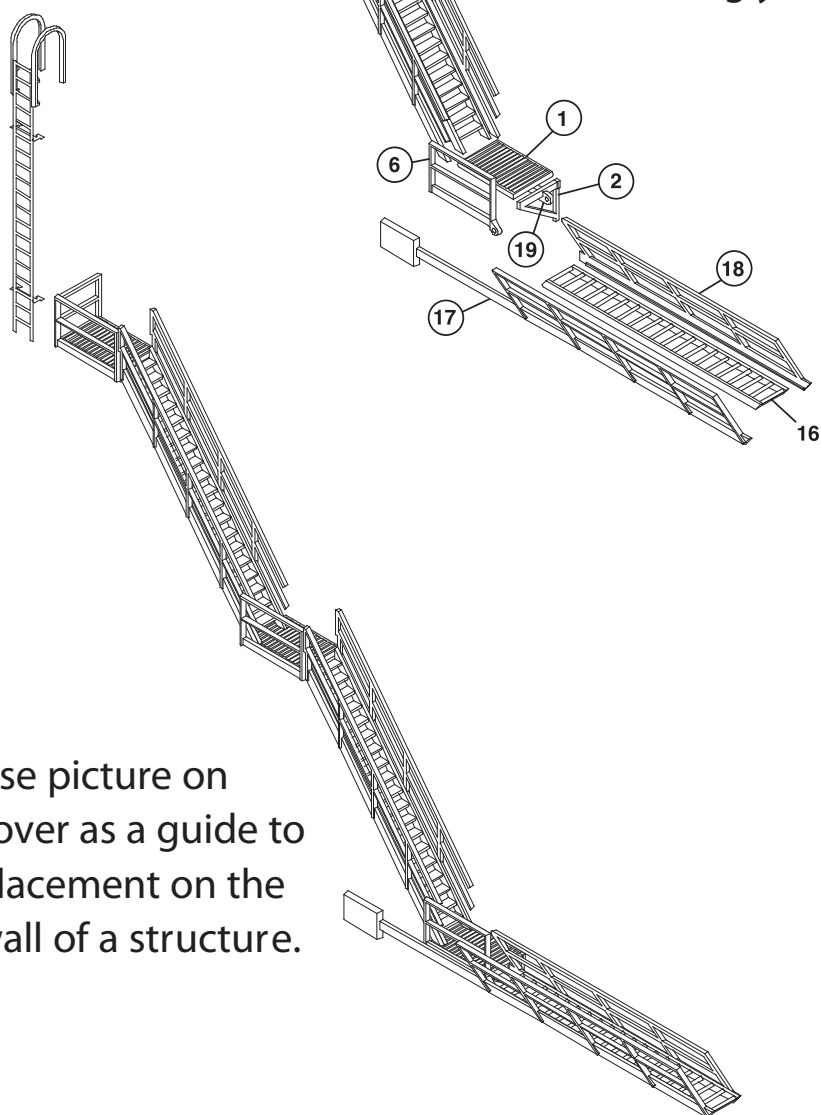

Use picture on cover as a guide to placement on the wall of a structure.

SINGLE - SMALL PLATFORM

Note: On non-modular structures you may need to adjust the height. To do so, cut railings (14, 15) at the ends where there are no posts. The stairway (13) will then have to be trimmed accordingly.

Use picture on cover as a guide to placement on the wall of a structure.

Check with your dealer, see the latest edition of the HO Scale Model Railroad Reference Book or our Web site at walterscornerstone.com for more information and ideas.
