

HO Scale Trackside Structures Set 933-2800

Built-ups

Built-ups Offer More Time for Modeling Fun

- Cornerstone Series® quality with no assembly needed
- Instant fun & realism for your railroad
- Working interior light in most buildings
- Molded in realistic colors
- Great for use with other Walthers buildings

Now you'll have more time to operate, kitbash, work on other projects, superdetail, plan, dream — do anything that makes your modeling more fun — because we've made adding superb structures to your railroad as easy as opening the box.

Cornerstone Series® Built-ups let you add highly detailed, fully assembled buildings to your HO, N or O Scale layout in minutes. With their fine detail and realistic colors, they can be used to create authentic scenes along any railroad. And since they're ready to use, they're great accessories for train sets and seasonal display layouts too.

Trackside Structures make your Railroad Look like A Railroad

In the early days, railroad structures were custom-built. The costs of planning new buildings, however, led American railroads to adopt standard designs in the 1880s. Using the same materials reduced expenses, simplified construction, and gave every building on the line a family look. Railroads also painted buildings in company colors to enhance their identity.

Walthers Trackside Built-ups make it easy to give your railroad that family feeling. Perfect for main, branch, shortline or industrial roads, you can mix and match to make your entire line more realistic. They're typical of designs used by American railroads until the 1970s, so they fit any location and era. Plus, they come in your choice of three realistic color schemes in HO, N and O Scale.

THREE-PIECE SETS WITH ACCESSORIES

Each set includes Interlocking Tower, Speeder Shed with Unpowered Speeder, Crossing Shanty, and Two Positionable Crossing Gates

HO SCALE \$29.98 EACH
933-2800 Yellow Ochre Siding w/Brown Trim
933-2803 Cream Siding w/Railroad Green Trim
933-2810 Light Gray Siding w/Dark Gray Trim

N SCALE \$29.98 EACH
933-2600 Yellow Ochre Siding w/Brown Trim
933-2603 Cream Siding w/Railroad Green Trim
933-2604 Light Gray Siding w/Dark Gray Trim

O SCALE \$49.98 EACH
Interlocking Tower features working interior light.
933-2700 Yellow Ochre Siding w/Brown Trim
933-2703 Cream Siding w/Railroad Green Trim
933-2709 Light Gray Siding w/Dark Gray Trim

More Trackside Built-ups

SPEEDER SHED

Located every 10 miles, these buildings were office and store-room for crews who repaired and inspected track. Models feature opening doors and a platform section to display the nonpowered Speeder.

HO SCALE \$19.98 EACH
Four assembled track bumpers are also included.
933-2801 Yellow Ochre Siding w/Brown Trim
933-2804 Cream Siding w/Railroad Green Trim
933-2811 Light Gray Siding w/Dark Gray Trim

O SCALE \$34.98 EACH
933-2701 Yellow Ochre Siding w/Brown Trim
933-2704 Cream Siding w/Railroad Green Trim
933-2710 Light Gray Siding w/Dark Gray Trim

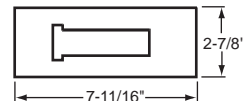

O Scale Walking Beam Oil Pump 933-2705

Working Oil Pump for your Layout

Finding oil is hard work — and so is getting it out of the ground. Most wells use walking beam or “horse head” pumps to do so. This working accessory is a great way to model this vital industry. Typical of American designs in use since the 1920s, it includes a detailed stationary diesel power plant, walking beam, rear crank and counterweight, plus the odd-shaped “horse head” front counterweight that gives the machines their nickname. It’s powered by a hidden drive with a slow-speed motor and gearbox that simulate the steady motions of the real thing.

O SCALE WALKING BEAM OIL PUMP

933-2705 \$59.98

CROSSING SHANTY

These tiny buildings sheltered crossing watchmen who stopped traffic as

trains passed. A perfect detail on every city street, each comes with a pair of positionable gates and six utility poles.

HO SCALE \$14.98 EACH

933-2801 Yellow Ochre Siding

w/Brown Trim

933-2804 Cream Siding

w/Railroad Green Trim

933-2811 Light Gray Siding

w/Dark Gray Trim

O SCALE CROSSING GATE

933-2702 \$29.98

Halt highway traffic with this working model on your O/O-27 layout. Gate comes fully assembled with black and white arm, a red LED signal, realistic counterweight and base. Connect to your power pack, then press the push-button switch to lower or raise the gate and activate the red warning signal. Designed for easy operation, it can be modified for use with automated systems (sold separately).

HO Scale Golden Valley Depot 933-2807

Golden Valley Depot

Where mainline meets Main Street, you’ll find the local depot. These combination stations (so called because they combine office, waiting room and freight room in one building) are typical of small-town stations all across the continent. Ideal for any era, many are still standing.

Ready to use on your layout, the Golden Valley Depot comes in the same colors as the Tracksides Built-ups.

Each includes a positionable semaphore-style train order signal, a brick platform in the traditional herringbone pattern, interior walls with molded details, “wooden” interior floor, a baggage cart and signs. A working interior light provides round-the-clock fun.

HO SCALE \$29.98 EACH

933-2806 Yellow Ochre Siding
w/Brown Trim

933-2807 Cream Siding

w/Railroad Green Trim

933-2808 Light Gray Siding

w/Dark Gray Trim

O SCALE \$59.98 EACH

933-2706 Yellow Ochre Siding
w/Brown Trim

933-2707 Cream Siding

w/Railroad Green Trim

933-2708 Light Gray Siding

w/Dark Gray Trim

HO Scale Golden Valley Depot 933-2808

Build Superdetailed City Scenes in Seconds

Transform empty lots into busy commercial areas with these buildings. Great for small towns or big cities, each is fully assembled and includes a working interior light.

HO Scale Fire Co. No. 4 933-2809

The Right Firehouse for your City

FIRE CO. NO. 4

933-2809 HO Scale \$39.98

Since the 1880s, the busiest firehouses in the city have protected the central business district and industrial areas. Taller buildings in these areas made the hook and ladder truck a necessity.

Stations built to house these large rigs had to be longer than those in other parts of town. Fire Co. No. 4 is one of these, with second-story living quarters and a tall hose drying tower. It also features opening wood doors for pre-1970s scenes installed, with roll-top doors for modern scenes included.

Many of these firehouses still serve today, typically housing an engine company or ambulance. Some have been preserved as museums, or remodeled into offices, shops and private homes.

Based on a typical early 1900s design, Fire Co. No. 4 is right at home with factories, railroad facilities or commercial buildings. Also ideal as a display model, it's deep enough to handle most ladder trucks. Realistic decals are provided for customizing.

HO Scale Walther's Water Street Building 933-2814

Own a City Landmark of Model Railroading

WALTHERS WATER STREET BUILDING

933-2814 HO Scale \$39.98

From 1958 to 1969, this handsome brick building at 1245 North Water Street was Walther's world headquarters. Built in 1890, it served a number of owners over the years and still stands today.

To celebrate Walther's 70th anniversary in style, we're pleased to offer this assembled HO Scale model of the classic Milwaukee landmark. It features a finely detailed brick facade, large bay window, four chimneys, rear freight door and a set of colorful printed signs that match the Walther's originals. Simply leave the signs off and you've got a great downtown building for any steam- or diesel-era layout.

Serve Up Exciting Times with the Silver Dollar Cafe

SILVER DOLLAR CAFE
933-2815 HO Scale \$29.98
933-2712 O Scale \$39.98

Long before interstate highways and fast food chains filled the landscape, going out to eat was a major event. Restaurants were friendly little places where the owners treated everyone like family. Here you might rub shoulders with train crews and truckers taking a break, kids going to a big dance, or folks on lunch from a nearby office or factory.

Small enough to fit any city block, the Silver Dollar Cafe offers a generous helping of realism for any city scene on your layout. Check out the big storefront windows, detailed trim molded in color with hand-painted insets, and colorful signs for five additional businesses.

8" TALL

HO Scale Silver Dollar Cafe 933-2815

O Scale Melissa's East Side Deli 933-2711

Spice up your City Scenes with Melissa's East Side Deli

MELISSA'S EAST SIDE DELI
933-2816 HO Scale \$29.98
933-2711 O Scale \$39.98

For decades, delis like Melissa's East Side were a fixture of big-city neighborhoods. Offering all kinds of specialty and ethnic foods, they were a vital part of the business district. Today you'll find many are still family-owned.

Perfect for busy corners or tucked between other buildings, Melissa's is right at home in any urban setting. It includes a side-entrance door, a handsome bay window on the upper floor and large ground floor windows. There's a big hanging sign for the front, which you can customize with colorful sticker signs for five additional businesses.

Trainloads of Fun with Thomas & Friends®

Thomas & Friends have introduced children of all ages to the fun of railroading. Now you can join in their travel fun with Bachmann's ready-to-run, HO Scale electric train sets and accessories based on the popular *Thomas and Friends* books and television shows. With locomotives that feature moving eyes, the cheeky blue engine and his friends will help you find adventure around every bend. For a complete listing of Thomas & Friends products, see the Bachmann listing in the Walthers 2003 HO Scale Model Railroad Reference Book.

Athearn is On the Move...

Athearn Announces Three Major Events at the International Model and Hobby Expo in Chicago

- **Athearn Acquires Rail Power Products**

Athearn has acquired Rail Power Products and its complete line of locomotive bodies and intermodal equipment. These exciting products will be added to Athearn's popular Ready-to-Roll line of layout-ready models.

- **Details West Box Cars Become Athearn Ready-to-Roll Models**

Details West models purchased by Athearn include a 50' Single Plug-Door car, a 50' Smooth-Side Single Plug-Door car, a 50' Plug & Sliding-Door car and a 52' Double Plug-Door car.

- **Athearn Enters the N Scale Arena**

Beginning in fall, 2002, Athearn will be manufacturing new detailed locomotives, rolling stock, vehicles and scenic accessories. The new products will come under the Athearn N Scale banner and are scheduled to be available in late 2002.

- **Athearn Announces Over 100 New Products in September 2002**

Displayed at the show were a wide range of new Genesis, Ready-To-Roll and licensed models. New releases include newly introduced equipment as well as exciting new paint schemes. For complete information please visit www.athearn.com.

Athearn/Rail Power Products
GP60M & GP60B

Athearn N Scale will
release an EMD F59PHI

New Athearn Genesis Auto Max Auto Carrier
