Wabash Streamlined Caboose

[Check walters.com](https://www.walters.com) for current pricing.

One of the most distinctive cabooses on the rails is now available as an accurate, superdetailed H0 Scale Walther'sProto® model. The Wabash RR's Decatur, Ill. Shops and International Car Co. built 90 of these streamlined cupola steel cabooses between 1945 and 1955. In addition to the Wabash RR, the Ann Arbor RR, Detroit, Toledo & Ironton, and Norfolk & Western Ry. used the caboose on their freight trains for decades with many serving through the 1970s. Walther's is proud to be the first to accurately reproduce this historic waycar in H0 Scale plastic.

This new Walther'sProto model features:

- Detailed interior with clear window glazing
- Factory installed separate wire grab irons and handrails, smokejack, roofwalk and other details
- Accurately detailed underbody with separately applied AB brake equipment with separate brake cylinders and rigging
- See-through running boards
- See-through end platforms where applicable
- Etched see through step treads
- Murphy or Diagonal panel roofs based on the prototype
- Rounded- or Square-window end doors, based on the prototype
- As built or modernized smokejack
- Proto MAX® metal knuckle couplers
- Correct swing-motion trucks with 33 scale inch diameter RP-25 metal wheels
- Minimum Radius: 18" (22" recommended)

With square-window end doors, Murphy panel roof and as-built smokejack.

With round-window end doors, diagonal panel roof, and as-built smokejack.

With square-window end doors, diagonal panel roof, and modernized smokejack.

Unpainted preproduction model shown.

Express Boxcars (Converted Troop Cars)

[Check walthers.com for current pricing.](#)

During World War II, when American Railroads' passenger car fleets were stretched to the limits, Pullman Standard and American Car & Foundry stepped up and filled out the nation's fleet. Essentially 50' boxcars on passenger-style trucks, the cars featured simplified interiors and were used by the military to move troops across the country. After the war, there was no longer a need for these spartan passenger cars and they were sold to several railroads at bargain prices. Most of the cars had their interiors removed and windows plated over for service as Express Boxcars. Many of these cars could be found on the headend of passenger trains into the 1960s.

The WaltherProto® models are available in three prototypical body styles that include the following features:

- Accurately modeled body with rivet seams, diaphragms and other details to match each prototype
- Authentically detailed, high-speed passenger-style trucks
- Correct RP-25 metal wheels
- Proto MAX™ metal knuckle couplers
- Factory-installed separate grab irons and steps
- Factory installed separate, non-opening side doors with or without windows as appropriate
- Minimum Radius: 18"

WALTHERS MAINLINE

Alco RSC-2 Locomotive

Check walters.com for current pricing.

ESU® Sound & DCC Standard DC

Add a unique branchline hauler to your roster with the WaltherMainline® Alco RSC-2. Essentially a modified version of a four-axle Alco RS-2, the RSC-2's six axles spread the locomotive's weight more evenly along the lighter rail found on branch and secondary lines. First built in 1946, the 1,500 hp Alco RSC-2 hauled freight and passenger trains and even served in yard switcher duty through the 1950s into the 1970s.

Accurately sized, the WaltherMainline model captures the details of the RSC-2, including its distinctive long trucks. A version is available with factory-installed ESU Sound & DCC that provides realistic sounds, including the growl of the Alco 244 prime mover. Other features include:

- Air- or Water-cooled exhaust stack as appropriate
- NEW! Available for the first time with ESU Sound & DCC:
 - Fully DCC compatible
 - 14, 28 or 128 speed steps
 - Dual mode DC & DCC
 - 4 Air horns changeable by CVs
 - 2 bells changeable by CVs

**FIRST TIME AVAILABLE
WITH SOUND & DCC!**

81' 8-Axle Depressed Center Flatcar

[Check walthers.com for current pricing.](#)

Heavy-duty, depressed center flatcars handle some of the largest loads on the rails. This new WaltherMainline® H0 scale 81' 8-Axle Depressed Center Flatcar is sure to be a favorite for anyone railfanning your layout. The prototype for this WaltherMainline car hauled oversize loads up to 150 tons. The 8-axle flatcars began service in the 1960s and can still be found on mainlines today.

Available in several realistic paint schemes, this layout-ready model features:

- One time run of these roadnumbers, order now - limited quantity available!
- Heavy die-cast metal body for outstanding performance empty or loaded
- Separate air and handbrake details at both ends per prototype designs
- Add a realistic load with the Cornerstone® Electric Transformer Kit (933-3126), or SceneMaster™ Transformer Kit (949-3107), both sold separately
- Articulated end platforms
- Four 100-ton trucks with 36 scale inch diameter RP-25 metal wheels
- Proto MAX™ metal knuckle couplers for reliable operation
- Minimum radius: 22" (24" recommended)

WALTHERS *MAINLINE*

60' Pullman-Standard Double-Door Auto Parts Boxcar

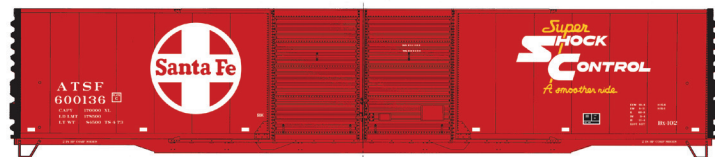

[Check walters.com](https://www.walters.com) for current pricing.

Faced with increasing numbers of heavy parts and time-sensitive schedules, automobile makers approached freight car builders in the early 1960s about creating a universal auto parts boxcar. The result was a 60' foot smooth side car with interior load restraints and wide door openings that made it easier for forklifts to quickly load and unload the cars. Some of these cars served the auto industry into the early 2000s.

This new run models a version of the car with an extra-wide, 16-foot opening on each side. Other features include:

- Two molded 8-foot Youngstown doors (non-opening) on each side
- Factory applied separate ladders and brake wheel
- Detailed underbody with simulated end-of-car cushioning and extended draft-gear box
- Correct 70-ton trucks with 33 scale inch diameter metal wheels
- Proto MAX™ metal knuckle couplers for reliable operation
- Minimum radius: 22"

Truss Railroad Bridge with Roadway

[Check walthers.com for current pricing.](#)

This Walthers Cornerstone® H0 Scale Truss Bridge with Roadway kit is based on steel bridges that carry both rail and vehicle traffic across rivers, highways, and industrial zones throughout North America. Perfect for urban and industrial scenes, this unique design features a full single-track Arched Pratt Truss railroad bridge with an attached roadway cantilever, allowing both rail and vehicular traffic to share the same span efficiently.

- Typical North American design seen from the steam era to the present
- Roadway includes deck, guardrails, and structural supports
- Matches NMRA overhead clearance; clears double-stacks and other tall cars
- Easily integrated into new or existing scenery
- Simulated steel construction with detailed girders, lattice work, and rivets
- Use with WalthersTrack™ Code 83 Bridge Track ([948-83004](#), sold separately) and your choice of H0 roadway surfaces
- Molded in dark gray plastic
- Shown assembled, painted and weathered by modeler.

Short Beam Bridge

[Check walthers.com](https://www.walthers.com) for current pricing.

This Walther's Cornerstone® HO Scale Short Beam Bridges kit makes it easy to add variety and realism to any right-of-way. Designed for railroads crossing creeks, ditches, or access roads, the kit includes parts to build two complete bridges — one short and one with extended supports for added clearance. Choose between wood or steel-style support piers to suit your era or region.

- Build two complete bridges from one kit — one tall and one short
- Mix and match wood or steel support styles for each bridge
- Great for spanning creeks, swampy lowlands, or access roads
- Usable across steam, diesel, and modern-era layouts
- Bridge ties designed to accept Walther'sTrack™ Code 83 or Code 100 rail
- Optional support piling for added height in the tall version
- Molded in dark brown plastic
- *Shown assembled, painted and weathered by modeler.*

Tudor House

[Check walthers.com](https://www.walthers.com) for current pricing.

This Walther's Cornerstone® H0 Scale Tudor House kit captures the charm and character of classic residential architecture from the 1920s to today. Featuring a steeply pitched roof, detailed brickwork, and multiple entry points, this structure is perfect for a variety of neighborhood settings — from older residential districts to well-maintained small-town homes. Realistic molded details, printed interior, and clear windows bring the home to life in any scene.

- Distinctive brick exterior with steep gables and classic chimney
- Front entry features molded awning
- Separate rear entrance with stoop and basement windows
- Utility meter and downspouts
- Printed interior sheet included
- Must-have home fits the 1920s to the present
- Molded in four colors with clear acetate windows
- Shown assembled, painted and weathered by modeler.
