SCALE	ANNOUNCED	EXPECTED DELIVERY
H0	September 2025	Winter 2026

85' Pullman-Standard Superliner® I

Check [walters.com](https://www.walters.com) for current pricing.

WaltersProto Superliner I passenger cars are back by popular demand. Following up on the Superliner I Coaches released last year, this new announcement includes Superliner I Sleepers, Diners and Lounges. Accurately detailed and decorated in Amtrak® Phase III and Phase VI paint schemes, these superdetailed modern passenger cars make it easy for H0 modelers to re-create many favorite Amtrak intercity trains.

The H0 Superliner I cars are based on prototypes introduced in the late 1970s, inspired by the Hi-Level Cars of the Atchison, Topeka & Santa Fe Railroad. Even though Amtrak added Superliner II cars in the 1990s, many of the original Superliner I cars remain in service today. They are essential cars for those modeling North American mainline during the last 45 years.

Other features include:

- Now available with factory printed numbers
- Paint color-matched to Amtrak standards
- Factory installed interior lighting on all models
- Correct prototype details
- Real metal finish simulates stainless steel
- Window gasket details
- Accurate, full upper and lower interior
- Prototypical tinted "glass" windows
- Factory-installed grab irons
- Working diaphragms
- Correct rebuilt airbag trucks with springs
- Correct 36" RP-25 turned metal wheelsets
- Proto MAX™ metal knuckle coupler
- Minimum radius: 24"

WALTHERS *MAINLINE*

39' Trinity 3281 2-Bay Covered Hopper

Check [walters.com](https://www.walters.com) for current pricing.

WaltersMainline makes it easy to add more modern-era business to your H0 Scale railroad with the 39' Trinity 3281 2-Bay Covered Hoppers! Built especially to handle heavier materials, these hoppers are often seen in unit trains moving loads of fracturing sand to new oil fields. Based on the later production prototypes introduced in the 1990s with seven side panels (two narrow and five large), they can also be found moving cement, bentonite and other heavier cargoes. Ready for service in a variety of modern schemes, each with four numbers, they're perfect for serving the Cornerstone® Glacier Industrial Sands (933-4035), or the Road-to-Rail Aggregate Transfer (933-4036) structure kits, both sold separately.

Features of these models include:

- In service from late 1990s to the present
- Built especially for heavier materials including fracking sand, cement, bentonite and more
- Separately applied brake gear, running board, discharge gates, inlet hatches and end ladder cages
- Correct 36" RP-25 metal wheelsets
- Proto MAX™ metal knuckle couplers
- Minimum radius: 18"

Glacier Industrial Sands

Check walters.com for current pricing.

Spot your new Trinity 3281 hoppers at this contemporary trackside industry - the Walther's H0 Scale Cornerstone Glacier Industrial Sands kit. While sand has been used for centuries to make building materials, glass and metal castings, you'll also find it in paint, fertilizer and plastics. Recently, "fracturing sand" or "frac sand" has become a hot commodity, used to break rock and improve the flow at new oil and gas fields. But you can't use just any kind of sand for any kind of product, which means it's got to be hauled long distances from producer to end user - a big job tailor-made for today's railroads and Trinity 3281 covered hoppers!

The Glacier Industrial Sands kit features:

- Contemporary trackside industry
- Prototypes transfer sand and other aggregates from trucks to covered hoppers
- Railcar loading area with safety harness beam
- Two conveyors, truck fuel tank, main office and guard shack
- Includes mixing bin, piping and double loading silos
- Printed company and safety signs
- Shown assembled, painted and weathered by modeler.

70-Ton AAR 3-Bay Open Hopper

Check [walters.com](https://www.walters.com) for current pricing.

The WaltherMainline H0 Scale AAR 70-Ton 3-Bay Open Hopper is based on a design adopted by the Association of American Railroads. The 70-ton capacity car was widely used to haul coal, but was also used to carry aggregates, minerals or ballast. Featuring all new names and numbers, each model features nine side panels and roadname-appropriate flat or arched ends. The car is ready to run on your H0 railroad with a die-cast metal chassis, correct 33" RP-25 turned metal wheelsets and Proto MAX™ metal knuckle couplers.

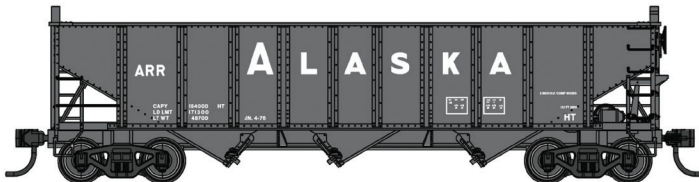

Other features include:

- All new tooling
- Car follows 70-ton, 9-panel AAR design
- 40'8" inside length
- Available with or without end arches as appropriate

- Ajax hand brake
- Die-cast chassis for excellent performance loaded or empty
- Correct 33" turned metal RP-25 wheels
- Proto MAX™ metal knuckle couplers
- Add an instant load with Chooch® Flexible coal loads

Vintage Coal Dealer

Check [walthers.com](https://www.walthers.com) for current pricing.

The Walthers Cornerstone H0 Scale Vintage Coal Dealer is the perfect compliment to the new WalthersMainline™ 70-Ton 3-Bay AAR Open Hoppers. Shoehorned alongside mainlines and sidings in big cities and small towns, trackside dealers sold coal and fuel oil for home heating and were common sights along North American railroads. The Cornerstone H0 Scale kit includes buildings that can be easily arranged to fit in odd-shaped spaces. The structures are typical of facilities found throughout the country from the 1920s to the 1960s.

The Vintage Coal Dealer kit includes:

- Brick office building
- Concrete coal bunker with between-the-rails unloading grate
- Two coal conveyors
- Vertical steel fuel tanks with pump house
- Detailed trestle with supports, abutment, railing and walkway with optional bulkheads to build below-track storage bins
- Molded approach ramp for coal trestle. Flex-track (not included) suggested for coal trestle rail
- Printed interior sign sheet and decals
- Shown assembled, painted and weathered by modeler.

Vintage Coal Dealer Kit

[933-4094](https://www.walthers.com)

Measures:

Office: 4-7/16 x 3-9/16 x 2-17/32" 11.27 x 9.05 x 6.43cm

Coal Bunker: 8-7/8 x 3-1/2 x 7-3/8" 22.1 x 8.7 x 10.9cm

Oil Pump House: 1-1/4 x 1 x 1-3/8" 3.2 x 2.5 x 3.5cm

Oil Tanks: 1-5/16 x 1-5/16 x 4-3/16" 3.3 x 3.3 x 10.64cm

Coal Trestle: 24-1/2 x 4-3/8 x 1-3/4" 62.3 x 11.1 x 4.4cm

Fencing: 30" of "wooden" fencing 76.2cm

Railroad Paint Shop

Check [walthers.com](https://www.walthers.com) for current pricing.

Give your railroad a place to keep its fleet looking fresh with the Cornerstone Railroad Paint Shop! Modeled after contemporary industrial facilities, this kit captures the look of the shops used by railroads, short lines, and contract car repair companies since the 1970s. With its tall roll-up service doors, rooftop HVAC units, and exterior dust-collection system, it's a must-have centerpiece for any engine terminal or railcar service area. Perfect for modeling repaints, patched equipment, or brand-new deliveries, this structure brings authentic modern operations to your layout.

The Railroad Paint Shop kit features:

- Contemporary-style design fits layouts from the 1970s to today
- Two large roll-up service doors accommodate modern diesels and rolling stock
- Includes detailed rooftop HVAC units, vents, and ductwork
- Exterior-mounted dust collector/filtration system with realistic piping
- *Shown assembled, painted and weathered by modeler.*

Windsock

Check [walthers.com](https://www.walthers.com) for current pricing.

Bring extra detail to your layout with the SceneMaster Windsock! Just like the real thing found at airfields, factories, and rail-served plants, this easy-to-add addition brings context to your scene, showing that operations on your railroad follow real-world safety practices. Whether placed near an industrial complex, a shortline shop, or a small-town airport, the windsock's bright color and tall pole make it a unique, eye-catching detail for modern scenes.

The Windsock kit features:

- Set of six poles with realistic paper windsocks
- Ready to use or easily weathered for a realistic look
- Perfect for airports, heavy industries, or rail-served facilities
- *Shown assembled, painted and weathered by modeler.*
