## COVER STORY & BELOW:

Morning light slips across the rails as traffic approaches from both directions, the steady rhythm of work unfolding along the right-of-way. Crews prep for the day, locomotives ease into view, and the railroad awakens with the quiet confidence that everything will move as planned. Out on the main line or in the yard, it's the track beneath it all that keeps the system running—unseen, uncelebrated, but absolutely essential.

Below, the perspective shifts to a curve where a locomotive rounds the bend with a short string of cars, wheels humming in harmony with the rails. It's a simple moment, yet it captures the heart of railroading: the trust that every joint, tie, and length of steel will guide the train safely forward. That same trust is what WaltherTrack brings to your layout—smooth operation, consistent performance, and the kind of reliability that keeps the story of your railroad moving day after day.

NEW GE P42 Locomotive

Check [walther's.com](http://walther's.com) for current pricing.

Bring modern passenger rail power to your H0 layout with the sleek and powerful General Electric P42 diesel locomotive. Featuring all-new tooling and available with factory installed ESU® Sound & DCC, this H0 scale P42 is the perfect choice for expanding your passenger fleet.

First built by General Electric between 1992 and 2001, the P42 "Genesis" is now one of the most recognizable diesel electric locomotives on North American Rails. The locomotive's 4,250 hp diesel engine helps it achieve a top speed of 110 mph. Most of the units serve on Amtrak® intercity service throughout the United States, although several are in operation north of the border with Via Rail Canada.

The newly tooled Walther's Mainline model captures all the details of its modern classic prototype, including accurate molded and separately applied parts and prototypical paint schemes. A top of the line Walther's Proto® drive, metal Proto MAX™ couplers, LED lighting, and metal wheels ensure a lifetime of reliable operation.

Other features include:

- Available with factory installed ESU Sound and DCC decoder featuring:
  - Dual mode DC/DCC compatible
  - 4, 28 or 128 speed steps
  - 4 function outputs with brightness control by CV
  - Air horn and bell sounds changeable by CV
  - Operating ditch lights flash when horn is sounded

• Same powerful drive as Walther's Proto locomotives:

- Five-pole, skew-wound motor for reliable, trouble-free operation
- 14:1 gear ratio for exceptional slow-speed performance
- Helical-cut gears for quiet operation & easy multiple-unit running
- All-wheel drive and electrical pickup for exceptional pulling power
- Dual-machined brass flywheels for smooth motor operation
- Heavy die-cast metal chassis keeps the locomotive on track
- Constant, directional LED headlights add even more realism
- Pre-installed speaker in standard DC and ESU DCC versions
- 21-pin DCC plug
- RP-25 contour metal wheels
- Proto MAX metal knuckle couplers

**NEW 40' Wood Stockcar with Dreadnaught Ends**

Check [walthers.com](http://walthers.com) for current pricing.

If you're modeling the mid-20th century on your layout, you'll want to add a couple or more of these distinctive WaltherMainline 40' stockcars to your H0 scale roster.

Since the 1800s, hauling meat on the hoof to market was a long-time business for North American railroads. By the mid 20th century, specialized stockcars were still hauling livestock on the rails but the cars had become modernized with many of the features found on other rolling stock of the era.

This WaltherMainline model captures many of the spotting features of these 1950s built prototypes, including corrugated steel Dreadnaught ends, metal roof and body mounted handbrake.

Other features include:

- Authentic slatted wood sides
- Detailed underbody with brake gear
- Proto MAX™ metal knuckle couplers
- 33" scale diameter RP-25 contour metal wheels

Each model features accurately detailed corrugated Dreadnaught ends.
